AVAILABILITY BY FLIGHT APP

Quick Reference

Version 2021

CONTENTS

AVAILABILITY BY FLIGHT APP-General Information

AVAILABILITY BY FLIGHT APP offers the possibility to search directly for flight connections by flight number. This option is particularly suitable if the customer has already found the flight connection on the Internet and now wants to book it through your travel agency.

AVAILABILITY BY FLIGHT APP-Basic Functionalities

First, Galileo queries all the flight connections for the route searched for. From these results, the system then filters out the flight numbers you are looking for and displays them.

AVAILABILITY BY FLIGHT APP-Examples

Entries without flight number search, e.g.

A17MARZRHNYC/LX or **A17MARZRHNYC/LX#**

```

Attention:
Availability by Flight searches only some lines of the availability, not all. To speed up Flight number searches in flight connections you can enter the connection point (if known).

Please note that due to the flight control of the airlines, not every availability can be sold and is therefore not displayed even in such cases. Instead, you will receive an empty mask. As an alternative they can only search with the conventional availability.
